- Silent/Live Auctions
- Appetizers and Cash Bar
- Estimated attendance: 250

What is Duchenne Muscular Dystrophy?

Duchenne Muscular Dystrophy (Duchenne) is the most common and lethal genetic disorder for children. Duchenne causes young boys to experience progressive muscle weakness as their bodies grow, their muscles die. Children with Duchenne are born healthy, walking, running and playing ball and are not diagnosed until around age 5. Walking will become difficult by age 10, they will be wheelchair bound by 12. In later stages, heart and breathing related muscles weaken and eventually fail before age 20.

What is the Jett Foundation?

The Jett Foundation is a local south shore based non-profit dedicated to saving this generation of boys with Duchenne. The Foundation was founded by the McSherry family soon after their 5 year old son Jett was diagnosed. In the past 10 years the Jett Foundation has raised \$2 million to fund groundbreaking research, launched the only Duchenne Clinic in New England and provides hundreds of children with adaptive sports and accessible summer camp experiences across the country.

Why Vegas Theme?

The odds of your child (or someone you know) being diagnosed with Duchenne is, unfortunately, much higher than many games of chance. Duchenne affects one in every 3,500 boys worldwide. Duchenne knows no boundaries and crosses all cultures. Approximately 60% of the Duchenne cases are hereditary, but an alarmingly high percentage (40%) occurs because of a spontaneous mutation at conception. It can happen to any family!

Why at Fenway?

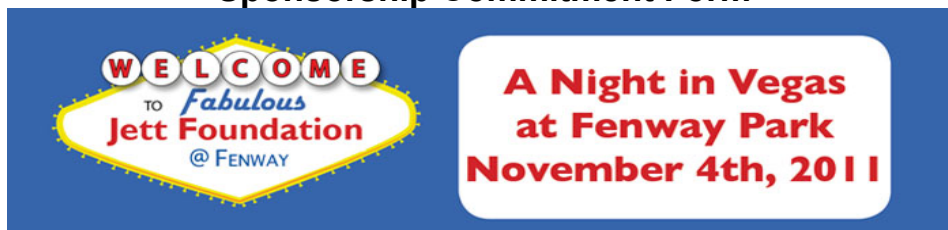

The Boston Red Sox Organization and Fenway Park epitomizes muscle strength and ability. Although boys with Duchenne lack the muscle strength to participate in sports they have a very strong desire to be as close to the game as possible. Our hope is that the inspiration from our boys and the "muscle" from organizations like the Boston Red Sox, together we can move mountains to improve the lives of these children!
